

Our service

Climate tech Ltd is an experienced licensed, skilled mechanical, repair and refurbishment contractor who has been carrying out corporate and domestic mechanical services works for over 4 years in Kenya while servicing all major cities and rural areas. Our service spreads all over Kenya. Our staffs' personnel include Engineers, qualified supervisors, technicians and all other related staff. We are able to provide from the smallest to even large of all mechanical and renovations services. We aim to provide the best mechanical installation services while bench-marking our standards and:-

- Satisfying our customers with high quality service.
- Providing a maximum supply to the local market.
- Using new technologies and products to serve our customers better.

OUR VISION

To be the best and most preferred “One Stop Centre” providing whole range of Mechanical, Plumbing, refurbishment and Fire fighting Installation Services for Residential, Commercial and Industrial buildings.

To be, and be recognized as the leading mechanical service provider in East Africa and whole of Africa and eventually in the whole world.

EXPANDING GOAL

We understand that some work can only be carried out on businesses out of hours to prevent loss of trade and are readily able to accommodate work times to suit your operating hours. We provide services to several of the largest inner city shopping complexes, five star hotels, high rise office buildings and large corporate property management companies' airports, hospitals and study institutions.
